KETEREX EXPANDS INTO NEW AUSTIN OFFICES

Continued Growth Drives Expansion

Austin, Texas, June 2, 2008 – Keterex, a leading developer of mixed-signal integrated circuits and systems, recently completed the relocation of its headquarters to new expanded offices in North Austin. The new location provides additional laboratory and office facilities to accommodate the company's expansion.

"We are very pleased with the new space, particularly the new lab area," said Jim Divine, President & CEO of Keterex. "The new facilities will allow us to complete more of our engineering work on site, which reduces our overall development time. We will be able to offer more products and services to our growing customer base as a result of this move."

About Keterex:

Keterex develops mixed-signal integrated circuits and systems to address unique challenges faced by embedded systems designers. Keterex combines expertise in mixed-signal design, embedded firmware development, and electronic systems manufacturing to create innovative and affordable products for industrial and consumer applications. Founded in 2004, Keterex is headquartered in Austin, TX.
